

Quality guarantee

Grömo has produced accessories for the roof drainage since 1888 and guarantees top quality. Grömo products are produced in all common metals of the norm DIN EN 612. The metals released in this norm under point 6 material requirements exclusively are used for the production:

- Aluminium sheet according to DIN EN 485
- Copper sheet according to DIN EN 1172
- Continuous galvanized steel sheet according to DIN EN 10346 (formerly DIN EN 10326 and DIN EN 10327)
- Continuous galvanized steel sheet with organic coating according to DIN EN 10169
- Stainless steel sheet according to DIN EN 10088-1
- Zinc sheet (titanium zinc) according to DIN EN 988

Grömo plug-in gutter outlets meet the demands of the norm DIN EN 12056-3 in their entirety. The confirmation and examination was made by the Technical University Munich.

Grömo takes further steps based on the corresponding quality standards:

- Examination of the products following our quality specifications.
- Strict incoming goods inspections for the pre-materials used.
- Participation in the German Packing-Waste Disposal-System INTERSEROH (no. 90098).
- Unmixed material recycling (all used metals).
